"HOW WAS YOUR DAY TODAY":

"How was your day today?" How many of you remember your parents asking you that question after a long day of school? And how many of us were willing and excited to divulge details of our day... especially when we were in middle school and high school? Showing your kids that you are interested in who they are and what goes on in their lives both during the school day and after the school day is important. There are many creative ways to ask them about their day, or to ask them about their friends and to encourage them to share more information. This article explains 25 different ways to ask them questions in ways they may not expect, and hopefully will help you stay connected with your middle schooler as they begin to grow more independent and mature.
